TO WHOM IT MAY CONCERN

Our company, CS Central America, S.A. de C.V., is located in El Salvador.

We run an extrusion plant, where we produce our own raw material (POY) and we also have 14 texturing machines.

We want to confirm that we have already developed and produce the polyester yarn DSY 80D/156F which is constructed with SDY 30/12 HS + DTY SD 50/144.

The yarn can be produced every time that our customer requested it, and right now, we already have a forecast for a 10 ton production for february 2012.

We also produce heather yarns, made from cationic + disperse yarns. We are constantly shipping CSD 80/72, CSD 100/144, CSD 150/144 yarns to Pettenati Centro America, and other companies located in the Central America region and South America.

CS Central America, S.A. de C.V., have enough capacity to supply the yarns above described and other polyester and nylon yarns.

We want to confirm that our position is the same as Pettenati. Our investment in the region was based on the Caffa DR Agreement and we don't see why products that can be produced in the Countries that signed the agreement should be put into a "short supply list".

Please feel free to contact us, for other questions you may have.

Regards,

Jorge Salazar
Director
