Attention: Ms. Kim Glas, Chairperson

Re: PCA Textiles
Commercial Availability Request-CAFTA-DR
Warp Stretch Woven Rayon, Nylon, Spandex Fabric
Our Reference: 12043-0660002

Dear Ms. Glas:

On behalf of our client, PCA Textiles (“PCA”), located at 222 West 37th St. #10 New York NY 10018, and pursuant to Section 203 of the Dominican Republic-Central America-United States Free Trade Agreement (“CAFTA-DR”) Implementation Act (19 U.S.C. 4033(o)(4)) and the Committee for the Implementation of Textile Agreements’ (“CITA’s”) Modified Final Procedures for Considering Requests Under the Commercial Availability Provision of CAFTA-DR (73 Fed. Reg. 53200 (Sept. 15, 2008)), we request that certain warp stretch woven nylon/rayon/spandex fabric be added to the CAFTA-DR Short Supply List at U.S. Note 20(a) to Chapter 98, Subchapter XXII, Harmonized Tariff Schedule of the United States (“HTSUS”), as it is not available in commercial quantities in a timely manner from a producer in the CAFTA-DR countries.

**Commercial Availability Request:
Public Version**

We note that this submission concerns a different fabric from that which we had consulted with your office in late 2012.

I. DETAILED PRODUCT INFORMATION

The subject fabric is certain warp stretch woven nylon/rayon/spandex fabric. The fabric specifications are as follows, some of which are expressed in ranges:

Fiber Content:	Rayon (67-80%), Nylon (15-35%), Spandex (2-6%)
Yarn Configuration:	Warp: nylon filament combined with spandex filament Filling: rayon staple
Yarn Denier:	Nylon and Spandex of various deniers
Width:	56-60" (142 to 153 cm)
Weight:	220-315 grams per square meter
Thread Count (Density):	76-110 Ends per inch (Warp) X 70-90 Picks Per Inch (Filling); (30-44 ends per cm (Warp) x 27-36 picks per cm)(Filling)
Weave Type:	Twill Weave
Finishing Processes:	Airjet Dyed

The requested fabric is classifiable under the following HTSUS subheadings:

- 5516.22.0040- woven fabrics of artificial staple fibers: Containing less than 85% by weight of artificial staple fibers, mixed mainly or solely with man-made filaments: dyed; twill weave.
- 5516.23.0040- woven fabrics of artificial staple fibers: Containing less than 85% by weight of artificial staple fibers, mixed mainly or solely with man-made filaments: of yarns of different colors; twill weave.

The subject fabric is airjet dyed. Traditionally, dyed fabric is provided for under the subheading for dyed fabric, 5516.22.0040, HTSUS. As we note and as noted in previous petitions, yarns may absorb the dye differently during the dyeing process. Under the HTSUS, such

a fabric may be classified as a fabric of yarns of different colors. Thus, the listed tariff classifications include those for fabrics that are dyed as well as for fabrics of yarns of different colors.

II. QUANTITY

PCA will require a total of [*****] of the subject fabric per month/ [*****] per year [(*****] per month/ [*****] per year), for delivery to one or more specified factories in the CAFTA-DR territory, within [****] from the date the order is placed.

III. DUE DILIGENCE

Attached as **Exhibit A** are the signed Due Diligence Certifications required under the CITA Final Procedures. In performing the due diligence required by CITA's Modified Final Procedures, we identified possible CAFTA-DR suppliers for the subject fabric using five sources:

- First, we consulted Davison's Textile Blue Book ("Davison's), ordered from <http://www.davisonbluebook.com/textilebluebook>. Davison's is a database of manufacturers in the textile and apparel industry, which is sortable by types of textiles, products, companies, and by countries/regions of the world.
- Second, we reviewed lists of companies contacted in connection with prior commercial availability proceedings from 2008 forward involving similar fabrics.
- Third, PCA identified potential suppliers based on its knowledge of the industry.
- Fourth, as is described in more detail below, we provided our due diligence inquiry to major textile trade associations in the United States ("US") and the CAFTA-DR countries.
- Fifth, during the course of due diligence for a similar (but different) fabric for which a petition was not filed, we provided OTEXA with our initial due diligence list for its

review. We added the additional associations and mills identified by OTEXA as potential suppliers to our due diligence list.

On April 12, 2013, we sent communications via email to the companies and textile trade associations in the US and the CAFTA-DR Countries identified using the sources described above. On April 26, 2013, we sent follow up communications via emails to the companies and textile trade associations that did not respond to our initial inquiries. Finally, on May 3, we sent a follow up email to Industrias de Hilos, S.A. de C.V., as the company had not been included in the follow-up emails sent on April 26. The request letter explained that PCA supplies fabric to companies that manufacture garments in CAFTA-DR countries and thus seeks to obtain fabric that could be used to produce CAFTA-DR qualifying apparel. The request letter included the same table of detailed fabric specifications as appears in this letter, as well as information about required quantities. Additionally, the letter requested supplier's proposed production timeline. As these were initial inquiries, a sample was not submitted to the associations and suppliers. Attached in **Exhibit B** are copies of the emails sent to each fabric producer (**Exhibit B(1)**) and trade association (**Exhibit B(2)**). Also attached in **Exhibit B** are the responses that were received. We request confidential treatment of all attachments.

Attached as **Exhibit C** is a chart that lists all the CAFTA-DR producers and trade associations that were identified during our due diligence research and to which we sent request letters. **Exhibit C(1)** reflects the producers located in the CAFTA-DR region and the US and **Exhibit C(2)** reflects the trade associations. Columns B through F list the producers and associations contact information. Column G reflects the initial correspondence date. Column H reflects the responses and any subsequent contact, including subsequent attempts to contact

suppliers when no response was received. Highlighted in red are the suppliers that affirmed it could not produce the required fabric (as well as associations that indicated that the fabric is unavailable). Highlighted in yellow are the suppliers that we could not contact with the available information, despite requests for updated contact information from the relevant associations.

In short, all of the parties contacted either affirmatively indicated an inability to produce the fabric or failed to respond to at least two attempted communications. Thus, as confirmed by the due diligence described in the table attached in **Exhibit C**, the requested fabric is unavailable from CAFTA-DR producers for the purposes of the short supply provision.

IV. SUBSTITUTABLE PRODUCTS

As noted above, the specifications for the requested fabric are expressed in ranges, to give producers the most flexibility to provide fabric that would fulfill PCA's requirements. PCA is unaware of any fabric outside the ranges of these specifications that is substitutable for the requested fabric. PCA's customers, who manufacturer CAFTA-DR eligible apparel made from fabric of this type, expect that the fabric satisfy these specifications (both in terms of the ranges and finishing). Fabric not meeting the specifications outlined above would not permit PCA to meet the demands of its customers. In any event, no party has indicated its ability or interest in making a purportedly substitutable product.

V. CONCLUSION

PCA seeks to purchase the subject warp stretch woven nylon/rayon/spandex fabric for use in garment production in CAFTA-DR countries. The foregoing letter and the attached documentation confirm that the fabric PCA seeks is not available in commercial quantities from

CAFTA-DR producers. We therefore respectfully request that CITA add this fabric to the CAFTA-DR Short Supply List.

We appreciate your kind consideration in this matter. Please contact Arthur W. Bodek or Angela M. Santos at (212) 557-4000 with any questions.

Sincerely,

GRUNFELD, DESIDERIO, LEBOWITZ,
SILVERMAN & KLESTADT LLP
